

ABSTRACT OF THE INVENTION

A multi use golf tool for use in combination with a golf tee comprising a housing and a piston slideably through said housing, the piston receiving and holding a golf tee. The tee is inserted into the ground by placing the tool housing in the ground, moving the tee containing piston downward through the housing thereof inserting the tee in the ground and removing the tool from around the tee. The tool of the present invention may also include a divot repair tool, a ball marker, tee storage means and/or a cigar/cigarette rest.
